For a logical mind

Dear parent,

The **Chess'n Math Association** provides chess lessons to over 10,000 children each week in more than 300 schools across Canada.

Chess is a fun activity as well as a tool to stimulate concentration, memorization, imagination and logical thinking.

The **Chess'n Math Association** uses a learning program with levels from beginner to advance. Practical play (hands-on) sessions form a part of every lesson. Exercise sheets are also provided to each child. They can be used at home to review concepts learned in class.

Genesis Elementary school offers the possibility of providing chess lessons to children as an extra-curricular activity. The cost per child is 80\$ and classes will be given for **8 weeks**. The lessons will be given on **Tuesday** from **12:30pm** to **1:30pm**. **The lessons will begin on October 3rd 2017.**

Registration online (link below) and by telephone only until September 29th, 2017:

Why chess?

Learning chess is a long-term investment well beyond the borders of school. Chess has often been described as the perfect educational tool because of the amount of cognitive skills it trains while kids are having fun playing. Indeed, research shows there is a strong correlation between learning to play chess and academic achievement. Moreover, being part of a chess club is associated with improved social skills, improved perseverance, and better verbal communication. So the real question is why not?
